Information about test offer required for international travel

Dear Study Participant,

Valneva, the sponsor of VLA2001-301 is aware about the uncertainty with regards to requirements for international travel.

While it is clear that vaccination within this clinical trial will be valid for the requirements of the NHS COVID pass, it is unclear or uncertain whether this will be acceptable for other countries.

In order to mitigate the concern of acceptability of your vaccination course in this clinical trial, Valneva would like to offer the following to all study participants who plan to travel abroad.

Every participant who plans to travel outside the UK and may require a negative SARS-CoV-2 test to do so, will get a refund for a maximum of 2 of such required tests upon provision of the test result and receipt of payment (the maximum amount of refund will be 100 GBP per test).

All participants are eligible regardless of age or which vaccine you may have received. However, for participants aged 30 and above, a pre-requisite for refund is that you stay blinded to the study treatment.

If you have any questions, please contact your study doctor.

We thank you very much for your participation in this study.

Kind regards,

Michael Krammer
Clinical Project Manager for VLA2001-301
